

DVBS2-1000CA

VAST Certified High Definition Twin Tuner Satellite Receiver

Description

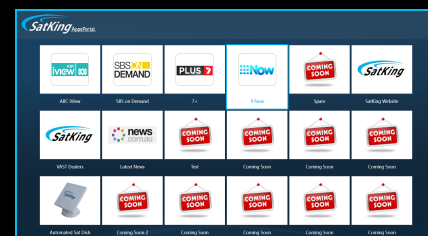

The SatKing DVBS2-1000CA combines VAST satellite TV and catch up TV in one receiver, making this still the most advanced VAST receiver on the Australian market. Fully designed in Australia, this fully featured top of the range receiver brings a level of features unmatched on the VAST TV platform.

Connect an external hard disk drive to one of the dual USB ports and you can use up to a 3TB HDD to take advantage of the built in twin tuners. You can record any two channels and watch a third program from within a network all at the same time.

The receiver has all the market leading features you expect from SatKing. Ultra compact size, built in signal finder, 12/240V operation, 8 Day extended EPG, front channel display, coaxial/optical digital audio outputs all in lightweight robust metal case.
